1. There is a barracks with Soviet troops and a fuel depot 1 km north of the Pétfürdő railway station. The barracks is 16 by 42 meters in size, and three stories high. It is occupied by two Soviet guard companies with a total strength of 190 to 195 men. The troops wear bright blue facings, indicating that it is a depot of the Soviet Air Force. The area is enclosed by a barbed wire fence and there are watch towers 10 meters high at each of the four corners, equipped with reflectors. The depot has direct rail connection with the station at Pétfürdő. The gasoline depot has six tanks, each of which has the capacity of a railway tank car, and three tanks on concrete foundations, of 10,000 hectoliters capacity each.
2. Ammunition Depots.
 - a. At Devecser there is a central ammunition depot with 20 magazines which together will hold about 200 carloads of ammunition.
 - b. At Nagytétény-Törökbálint there is a central depot of 30 underground magazines and 12 barracks on concrete foundations. The depot has a capacity of 840 to 860 carloads of ammunition.
 - c. On Csepel Island there is a gunpowder depot with two large magazines which together will hold 300 carloads of powder.
 - d. At Törökbálint there is a depot with three magazines. One contains 10 carloads of finished ammunition; the second, 10 carloads of detonators, and the third, 12 or 13 carloads of powder. The depot belongs to the Törökbálint ammunition works.
